

§ 2410.2

(a) The lands must be physically suitable or adaptable to the uses or purposes for which they are classified. In addition, they must have such physical and other characteristics as the law may require them to have to qualify for a particular classification.

(b) All present and potential uses and users of the lands will be taken into consideration. All other things being equal, land classifications will attempt to achieve maximum future uses and minimum disturbance to or dislocation of existing users.

(c) All land classifications must be consistent with State and local government programs, plans, zoning, and regulations applicable to the area in which the lands to be classified are located, to the extent such State and local programs, plans, zoning, and regulations are not inconsistent with Federal programs, policies, and uses, and will not lead to inequities among private individuals.

(d) All land classifications must be consistent with Federal programs and policies, to the extent that those programs and policies affect the use or disposal of the public lands.

[35 FR 9560, June 13, 1970]

§ 2410.2 Relative value, disposal or retention.

When, under the criteria of this part, a tract of land has potential for either retention for multiple use management or for some form of disposal, or for more than one form of disposal, the relative scarcity of the values involved and the availability of alternative means and sites for realization of those values will be considered. Long-term public benefits will be weighed against more immediate or local benefits. The tract will then be classified in a manner which will best promote the public interests.

Subpart 2420—Criteria for Multiple-Use Management Classifications

§ 2420.1 Use of criteria.

In addition to the general criteria in subpart 2410, the following criteria will be used to determine whether public lands will be retained, in Federal ownership and managed for domestic livestock grazing, fish and wildlife development and utilization, industrial development, mineral production, occupancy, outdoor recreation, timber production, watershed protection, wilderness preservation, or preservation of public values that would be lost if the land passed from Federal ownership.

[35 FR 9561, June 13, 1970]

§ 2420.2 Criteria.

Lands may be classified for retention under the Classification and Multiple Use Act of September 19, 1964 (78 Stat. 986, 43 U.S.C. 1411–18), if they are not suitable for disposal under the criteria set forth in part 2430 and such classification will do one or more of the following:

(a) Assist in effective and economical administration of the public lands in furtherance of the several objectives of such administration as expressed in the various public land laws.

(b) Further the objectives of Federal natural resource legislation directed, among other things towards:

(1) Stabilization and development of the livestock industry dependent upon Federal lands, such as sections 1 and 15 of the Taylor Grazing Act (43 U.S.C. 315 and 315m), and the Alaska Grazing Act (48 U.S.C. 471–471o).

(2) Provision or preservation of adequate areas of public hunting and fishing grounds and public access thereto, and maintenance of habitat and food supplies for the fish and wildlife dependent upon the public lands and maintained under Federal and State programs, such as section 9 of the Taylor Grazing Act (43 U.S.C. 315h) and the Fish and Wildlife Coordination Act (16 U.S.C. 661–666c).
